NEWS RELEASE

Caliber Crossflame® Burner and Radiant System Receives Utility Patent and Trademark

HUNTINGTON BEACH, CA (August 2019) – Caliber Appliances, makers of award-winning grilling products, proudly announces a utility patent and trademark for its Crossflame burners and radiant system by the USPTO. These top-of-the-line grills have been designed to offer the performance that commercial chefs expect thanks to the evenness achieved from this unique grilling technology that is now protected through the patent.

Caliber's patented Crossflame burner design is coupled with a unique radiant system which results in an ultra-even grilling machine. Each burner yields an even flow of heat down to the furthest corner of the grill. By delivering heat evenly and powerfully, this stainless steel radiant system uses energy more efficiently and gives cooking results with fewer flare-ups.

You can also *Expect Great Heat* from these burners. The Crossflame burner powers the Crossflame Pro Grill with 30,000 BTU of heat, the Rockwell by Caliber Social Grill with 20,000 BTU of heat, and the Indoor Professional Rangetop grill configuration with 30,000 BTU of heat. The excellent performance is coupled with beauty in design that makes these grills and rangetops the focal point of any kitchen and entertaining area.

With a combination of power and evenness and a lifetime warrantied sold stainless steel burner and radiant system, the Crossflame burner is the perfect tool to transform a kitchen into a commercial grade Culinary Center. Caliber meticulously designs their products not just for power and efficiency, but for flexibility and versatility to satisfy the needs of grilling enthusiasts.
